## PROJECTS

### E-commerce Web Application |

- Build a responsive e-commerce website using **React, Redux-toolkit, React-router-dom, Tailwind**.
- Users can view detailed product information by clicking on any product.
- Implemented "Add to Cart" functionality; each click increases the quantity of the selected product in the cart.
- The cart displays all added products, including their names, quantities, and prices.
- Users can increase or decrease the quantity of products directly from the cart.
- Added feature to remove individual products from the cart.
- The total price updates dynamically based on the selected products and quantities.

### Portfolio Website |

- Build a responsive portfolio website using **HTML, CSS, JAVASCRIPT**.
- In this website, I have shared information about myself and the skills I possess. Then, I have talked about my family members. I have created a well-designed and responsive website that you might find impressive.
